

ENERGY POLICY ISO 50001

COMPACT SEEDS AND CLONES recognizes that “complying with and enforcing” this policy is the responsibility of everyone involved in the organization.

At COMPACT SEEDS AND CLONES, dedicated to the PRODUCTION OF OIL PALM CLONES, we optimize energy use and energy consumption in our operations. We are committed to continuous improvement of energy performance and the implementation of an energy management system across all processes.

We ensure the availability of resources and information necessary for the implementation of the system and the achievement of our energy objectives and goals. Therefore, we support the design and procurement of energy-efficient products and services that impact energy performance.

We comply with legal and other applicable requirements related to energy efficiency, energy use, and energy consumption.

We periodically communicate and evaluate our results, as we understand that communication is a key factor in maintaining our high energy performance and competitiveness.

February, 2025.
